JAINIL CHAUHAN

Senior Frontend Engineer
Fremont, CA | 510-458-8787 | jainil04@gmail.com | linkedin.com/in/jainil04 | github.com/jainil04 | jainilchauhan.com

SUMMARY

Frontend engineer with 8 years building high-traffic e-commerce applications for Williams-Sonoma Inc. (Pottery Barn, West Elm, Williams Sonoma) and Levi Strauss & Co. Strong in JavaScript/TypeScript, Vue.js, React/Next.js, micro-frontend architecture, Core Web Vitals, and accessible, responsive UI, with measurable performance and cost wins.

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Frontend **Feb 2021 to Present**

Williams-Sonoma Inc., San Francisco, CA (via Info Way Solutions, then NTT Data / Nexient) *Product MFE serving 8 brands*

- **Cut product page payload and boosted speed:** co-designed a Product BFF redesign with one other engineer and wrote most of the code; it defers SKU-level data (prices, images, flags) until user interaction, cutting payload from about 20MB and improving time to interactive by about 80%.
- **Owned Core Web Vitals** (FCP, LCP, TTFB, TBT) across Global, Shop, and Product MFEs via code-splitting, deferred execution, and state reuse; presented before/after results to senior leadership.
- **Led a cross-repo investigation** into runaway Bing Maps API usage across six repositories: standardized caching, fixed a Canadian postal-code cache bypass, and flagged exposed API keys, cutting monthly transactions from 139M to about 80M (42%) and avoiding a higher enterprise contract tier.
- **Sustained the savings:** shipped a Mar 2026 follow-on fix cutting daily requests 18% (3.21M to 2.51M); usage has stayed under target six months running (about 70M a month vs. a 144M peak).
- **Built accessibility into every release:** validated Product MFE features with VoiceOver, keyboard-only navigation, and Lighthouse accessibility audits, and fixed the issues found for inclusive shopping across brands.
- **Built reusable, shared frontend architecture:** shared Quick Look and AI sales-nudge components across MFEs via Webpack Module Federation; centralized shared dependencies in the Global shell to shrink bundles.
- **Debugged production browser issues:** traced an iOS Safari crash in the 3D Bedding Visualizer to off-screen geometry recomputation via device CPU profiling; shipped a visibility-gated fix.
- **Delivered across teams:** shipped Figma-driven features across all 8 brands ahead of deadline with zero defects, backed by Jest tests (standard on every feature and bug fix); took over a teammate's Outward third-party integration mid-flight and released it to production with zero issues.
- **On-call and tooling:** part of peak-season triage with QE (ELK, Grafana); reviewed PRs daily; built agentic PR and Jira tooling.

Tech: JavaScript (ES6+), Vue 3, Vuex, Node.js (BFF), Webpack Module Federation, Tailwind, SCSS, Jest, Playwright, Docker, Git

Software Engineer, Frontend **Jul 2018 to Feb 2021**

Levi Strauss & Co., San Francisco, CA (via Info Way Solutions)

- Built the Order History page, Loyalty enrollment/dashboard, and checkout form for Levi's new Vue.js commerce platform.
- Built debounced typeahead search (Elasticsearch) and GraphQL schema/resolvers for the BFF, with JWT auth for REST calls.
- Drove an 18% mobile performance improvement via SCSS and asset-loading optimizations; built to WCAG 2.0 with Jest tests.
- As an Adobe Target A/B test developer, shipped redesigned navigation, carousel, and modal; several tests won.

SELECTED PROJECTS

Mail All Center (mailallcenter.com): designed, built, and deployed a production site in Next.js (App Router) and TypeScript on Vercel for a local Live Scan, notary, and apostille business; owned UI, Tailwind styling, and SEO.

Lighthouse Monitor (github.com/jainil04/lighthouse-performance-tests): full-stack Core Web Vitals monitor (Vue/Vite, Node/Express, PostgreSQL, BullMQ scheduled Lighthouse runs).

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Python (working knowledge)

Frontend: React, Next.js, Vue 3, Vuex, SCSS, Tailwind, Module Federation, Web Components, responsive UI, accessibility

APIs & Backend: REST, GraphQL, Apollo, Node.js, Express, BFF architecture, JWT, PostgreSQL

Testing & Tooling: Jest, Playwright, Webpack, Vite, Git, CI/CD, Docker, Core Web Vitals / Lighthouse, ELK, Grafana

EDUCATION

M.S., Computer / Information Technology Services Administration Management, Campbellsville University 2019

M.S., Computer Science (Software Engineering), Northwestern Polytechnic University 2016

B.E., Computer Information Technology, Ganpat University 2015
